

# MITANOL C30

---

## Super-longlife coolant purple

### Properties

**MITANOL C30** is a radiator protection based on ethylene glycol, free of potentially harmful substances such as nitrites, amines, borates and phosphates. Due to an optimal combination of very stable inhibitors based on silicate-free carboxylic acid technology, **MITANOL C30** offers excellent corrosion and cavitation protection for longest coolant life. Further additives prevent the coolant from foaming and prevent deposits. **MITANOL C30** offers year-round frost and corrosion protection that is maintenance-free over the entire service life of the engine. The coolant has no negative influence on coolant hoses or cylinder head gaskets.

### Application notes

**MITANOL C30** mixed with the corresponding quantity (distilled water) water is used as a coolant and heat transfer fluid in modern combustion engines, whether engines made of cast iron, aluminium or a combination of both metals. **MITANOL C30** is especially recommended for light metal engines where special aluminium protection is required at higher temperatures. An application concentration of 50 vol.% is recommended all year round.

**Caution:** Observe manufacturer's instructions.
